TIM WILLIAMS
CONSULTING LTD

Tim Williams, TWC Ltd

Senior Project Manager | PMO Manager | Service Transition Lead

Driving infrastructure, cyber, and service transition programmes with governance and assurance

Executive Summary

I deliver large-scale IT, infrastructure, and cyber programmes with a focus on execution certainty, operational readiness, and governance. My work spans national EUC transformations, identity and access uplift, PMO leadership, and service transition across complex, regulated, and multi-vendor environments. I bring structure, clarity, and assurance to programmes that require disciplined delivery, stakeholder alignment, and measurable outcomes.

My track record shows repeatability across sectors including financial services, utilities, government, healthcare, and aviation. I stabilise programmes, drive adoption, and ensure services are secure, resilient, and ready for BAU. My leadership is grounded in practical delivery, strong stakeholder engagement, and a consistent ability to bring order and momentum to challenging portfolios.

Global Infrastructure & EUC Transformations

National-Scale EUC Transformations

Tesco's 126,000-device EUC refresh and HSBC's 46,000-user modernisation demonstrate my ability to coordinate multi-region deployments, manage complex logistics, and stabilise large user estates. I ensured readiness, adoption, and operational continuity across environments with high regulatory and operational pressure.

Global Infrastructure & EUC Transformations

Modern Workplace & Cloud-Managed Deployments

United Utilities and NFUM highlight my capability in cloud-managed EUC, device lifecycle, and secure configuration at scale. I delivered structured governance, stakeholder alignment, and controlled rollout across 32,000+ devices, ensuring stable, supportable platforms.

Global Infrastructure & EUC Transformations

Sector-Specific Modernisation

At Newcastle University, I led Teams Rooms deployment and print modernisation across a diverse academic environment. I aligned technical delivery with user experience, operational support, and long-term service sustainability.

Cybersecurity & Identity

Cybersecurity & Identity Uplift

NHS England's CAF uplift and Luton Airport's MFA, PAM, and SSO programmes show my strength in regulated cyber environments. I delivered identity uplift, strengthened access controls, and embedded governance frameworks that improved security posture and operational resilience.

PMO Leadership & Governance

PMO Build & Leadership

At Computacenter Belgium and Eversheds, I built and led PMO functions that brought structure, reporting discipline, and delivery assurance to multi-stream portfolios. I established governance frameworks, improved stakeholder confidence, and stabilised programme execution.

Regulated & Government PMO

My work with the FCO, NFUM, and Dounreay Nuclear demonstrates repeatability in high-governance environments. I delivered structured reporting, risk control, and portfolio alignment across programmes with strict regulatory and operational constraints.

Service Transition & BAU Integration

Service Transition & BAU Readiness

I transitioned global services for Synchrony (25,000 users), integrated Salesforce into BAU, and stabilised major programmes through structured service readiness. I ensured operational teams were prepared, documentation was complete, and services were supportable from day one.

Cloud, Platforms & Application Services

Cloud, Platforms & Application Services

I delivered AWS migration and SaaS integration for Telefonica, led ServiceNow development and platform uplift, and supported secure hosted infrastructure for Mitie and the Home Office. My work shows breadth across cloud, platform, and application services with strong governance and delivery control.

Legacy, Migration & Infrastructure Modernisation

Identity, Messaging & Virtualisation

Santander, the MET Office, and Unipart demonstrate my ability to modernise legacy estates, uplift identity and messaging platforms, and deliver virtualisation programmes with minimal disruption.

Large-Scale Migration & Multi-Stream Portfolios

AdminRe and DWP highlight my capability in complex, multi-stream migration and infrastructure modernisation. I brought structure, clarity, and delivery discipline to challenging environments with high operational impact.

Pre-Sales & Commercial Leadership

Pre-Sales & Commercial Leadership

I supported tendering, solution design, and commercial modelling across major bids, ensuring proposals were deliverable, costed, and aligned with operational reality.

What I Bring

- I combine delivery discipline with cross-domain transformation experience, bringing structure, clarity, and assurance to complex programmes. My leadership strengthens execution, stabilises delivery, and ensures services are secure, resilient, and ready for BAU. I work confidently across infrastructure, cyber, cloud, identity, and service transition, aligning technical delivery with operational readiness and stakeholder expectations.

- I bring a repeatable approach that works across sectors — financial services, utilities, government, healthcare, aviation, and education. I create momentum in challenging environments, simplify complexity, and build confidence through governance, communication, and practical delivery leadership. My focus on outcomes, adoption, and long-term service sustainability ensures programmes land cleanly and deliver measurable value.
