Tim Williams

Senior Project Manager | PMO Manager | Service Transition Lead

Driving infrastructure, cyber and service transition programmes with governance and assurance

TIM WILLIAMS
CONSULTING LTD

EXECUTIVE SUMMARY

Execution certainty for complex programmes

I deliver large-scale IT, infrastructure and cyber programmes with a focus on execution certainty, operational readiness and governance — from national EUC transformations and identity uplift to PMO leadership and service transition in complex, regulated, multi-vendor environments.

My track record is repeatable across sectors. I stabilise programmes, drive adoption and make sure services are secure, resilient and ready for BAU — through practical delivery, strong stakeholder engagement and measurable outcomes.

126,000

devices refreshed

Tesco

46,000

users modernised

HSBC UK

32,000+

users transitioned

Synchrony

SECTORS DELIVERED ACROSS

- Financial services
- Utilities
- Government
- Healthcare
- Aviation
- Education

Order, momentum and assurance

1 Governance & Delivery Control

Clear frameworks, reporting rhythms and decision pathways that stabilise programmes under pressure — risks, dependencies and scope are actively controlled, not just observed.

2 Operational Readiness & Sustainability

Service transition embedded early, so documentation, support models and processes are in place before go-live. Built for long-term stability, not just deployment success.

3 Stakeholder Alignment & Communication

Complexity translated into clear, actionable narratives that build confidence across technical, operational and executive audiences — enabling faster decisions.

4 Outcome-Based Delivery

Delivery driven toward measurable results — adoption, stability, risk reduction and operational improvement — landing with the intended business and service impact.

CERTIFIED & ACCREDITED

PRINCE2 · APM · PMI · Six Sigma · ITIL · ATLASSIAN · CompTIA

ROLE FIT

Where I fit and where I add most value

I operate confidently in senior delivery and governance roles where structure, assurance and operational readiness are critical to success.

ROLES I FIT

- Senior Project Manager
- Programme Manager
- PMO Manager / PMO Lead
- Service Transition Lead
- Delivery Assurance Lead

WHERE I ADD MOST VALUE

- Complex, multi-vendor environments
- Regulated sectors with high governance expectations
- Programmes needing stabilisation, recovery or delivery discipline
- Transformations with significant operational impact
- Services transitioning into BAU with sustainability requirements

WHAT ORGANISATIONS GAIN

- Predictable, controlled delivery
- Strong governance and reporting discipline
- Confident stakeholder alignment
- Clean, stable service landings
- Measurable operational and risk outcomes

Delivering EUC change at national scale

NATIONAL-SCALE EUC

126,000
devices refreshed — Tesco

46,000
users modernised — HSBC UK

Coordinated multi-region deployments and complex logistics, stabilising large user estates while ensuring readiness, adoption and continuity under high regulatory and operational pressure.

MODERN WORKPLACE & CLOUD

32,000+
devices — United Utilities & NFUM

Cloud-managed EUC, device lifecycle and secure configuration at scale, delivered with structured governance, stakeholder alignment and controlled rollout to keep platforms stable and supportable.

SECTOR-SPECIFIC MODERNISATION

Teams Rooms
deployment — Newcastle University

Print
modernisation across a diverse academic estate

Technical delivery aligned with user experience, operational support and long-term service sustainability.

CYBERSECURITY & IDENTITY

Raising security posture in regulated sectors

NHS England's CAF uplift and Luton Airport's MFA, PAM and SSO programmes show my strength in regulated cyber environments.

Identity uplift

MFA, PAM and SSO programmes.

Stronger access controls

Strengthened access across regulated environments.

Embedded governance

Frameworks that improved security posture and operational resilience.

NHS England

CAF uplift

London Luton Airport

MFA, PAM & SSO

PMO functions that bring structure and trust

PMO BUILD & LEADERSHIP

At Computacenter Belgium and Eversheds Sutherland, I built and led PMO functions that brought structure, reporting discipline and delivery assurance to multi-stream portfolios — establishing governance frameworks, improving stakeholder confidence and stabilising execution.

REGULATED & GOVERNMENT PMO

My work with the FCDO, NFUM and Dounreay Nuclear / NRS demonstrates repeatability in high-governance environments: structured reporting, risk control and portfolio alignment across programmes with strict regulatory and operational constraints.

SERVICE TRANSITION & BAU INTEGRATION

Services that land cleanly into BAU

I transitioned global services for Synchrony, integrated Salesforce into BAU and stabilised major programmes through structured service readiness.

- ✓ **Teams prepared**
  Operational teams ready to run the service.
- ✓ **Documentation complete**
  Everything in place before go-live.
- ✓ **Supportable from day one**
  Support models aligned to the service.

Salesforce

Integrated into BAU with structured service readiness

Breadth across cloud, platforms and applications

I delivered AWS migration and SaaS integration for Telefónica, led ServiceNow development and platform uplift, and supported secure hosted infrastructure for Mitie and the Home Office.

Breadth across cloud, platform and application services — with strong governance and delivery control throughout.

AWS migration

SaaS integration

ServiceNow

Secure hosting

Telefónica

AWS migration & SaaS integration

Mitie

Secure hosted infrastructure

Home Office

Secure hosted infrastructure

Modernising legacy estates with minimal disruption

LARGE-SCALE MIGRATION & MULTI-STREAM PORTFOLIOS

AdminRe and DWP highlight my capability in complex, multi-stream migration and infrastructure modernisation, bringing structure, clarity and delivery discipline to challenging environments with high operational impact.

IDENTITY, MESSAGING & VIRTUALISATION

Santander, the MET Office and Unipart demonstrate my ability to modernise legacy estates, uplift identity and messaging platforms, and deliver virtualisation programmes with minimal disruption.

PRE-SALES & COMMERCIAL LEADERSHIP

Bids that are deliverable, costed and credible

I supported tendering, solution design and commercial modelling across major bids, ensuring proposals were deliverable, costed and aligned with operational reality.

Tendering

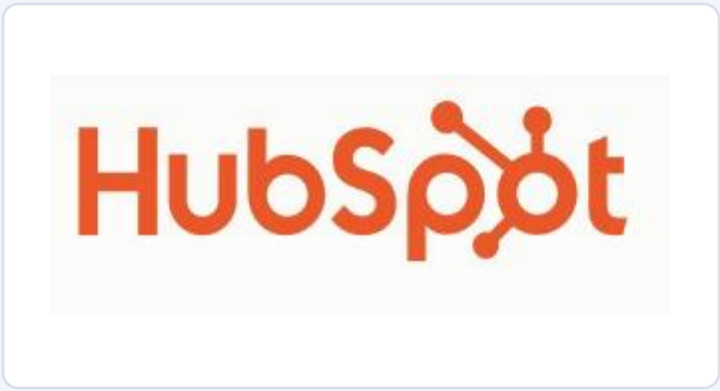

Supporting major bid responses.

Solution design

Solutions aligned with operational reality.

Commercial modelling

Proposals that are costed and deliverable.

SELECTED CLIENT

SUMMARY

What I bring

Execution certainty	Structure, clarity and governance that restore confidence and deliver predictably in high-pressure, regulated environments.
Cross-sector repeatability	A track record across financial services, utilities, government, healthcare, aviation and education — simplifying complexity at scale.
Operational readiness	Services land cleanly, with complete documentation, aligned support models and prepared operational teams.
Stakeholder confidence	Clear communication and alignment across diverse teams, creating momentum where delivery discipline matters most.
Long-term service value	A focus on adoption, stability and sustainability, so programmes deliver measurable outcomes — not just technical completion.

A repeatable, cross-domain delivery approach that strengthens execution, stabilises programmes and ensures services are secure, resilient and ready for BAU.
